Average Energy Prices, Atlanta – July 2016

Gasoline prices averaged \$2.059 a gallon in the Atlanta area in July 2016, the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Janet S. Rankin noted that area gasoline prices were 63.0 cents lower than last July when they averaged \$2.689 per gallon. Atlanta area households paid an average of 14.6 cents per kilowatt hour (kWh) of electricity in July 2016, less than the 14.9 cents per kWh paid in July 2015. The average cost of utility (piped) gas at \$1.467 per therm was similar to the \$1.444 per therm spent last year. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect the impact of seasonal influences.)

Atlanta area consumers paid \$2.059 a gallon for gasoline in July 2016, 10.0 percent lower than the \$2.287 paid nationally. A year earlier, consumers in the Atlanta area paid 7.1 percent less than the national average for a gallon of gasoline. The local price of gasoline has been at least 4 percent less than the national average in the month of July in four of the past five years. (See [chart 1.](#))

Technical Note

Average prices are estimated from Consumer Price Index (CPI) data for selected commodity series to support the research and analytic needs of CPI data users. Average prices for electricity, utility (piped) gas, and gasoline are published monthly for the U.S. city average, the 4 regions, the 3 population size classes, 10 region/size-class cross-classifications, and the 14 largest local index areas. For electricity, average prices per kilowatt-hour (kWh) are published. For utility (piped) gas, average prices per therm are published. For gasoline, the average price per gallon is published. Average prices for commonly available grades of gasoline are published as well as the average price across all grades.

All eligible prices are converted to a price per normalized quantity. These prices are then used to estimate a price for a defined fixed quantity. The average price per kilowatt-hour represents the total bill divided by the kilowatt-hour usage. The total bill is the sum of all items applicable to all consumers appearing on an electricity bill including, but not limited to, variable rates per kWh, fixed costs, taxes, surcharges, and credits. This calculation also applies to the average price per therm for utility (piped) gas.
